

Australia's not-for-profit sector is a driving force for positive change – delivering vital services and strengthening communities.

Yet, our *NFP Resilience Report* shows only one in four NFPs feels financially sustainable, with funding volatility a major challenge. To help address this, ACF offers the NFP Future Fund to organisations seeking to build an endowment through our responsibly invested portfolio and secure their long-term impact.

Here are 40 organisations across Australia using an NFP Future Fund to build sustainability.

To give from your ACF Fund, log in to our online Fund Portal and request a grant, or contact our team on **03 9412 0412** or grants@communityfoundation.org.au

Arts and Culture

Abbotsford Convent | VIC

Australia's largest multi-arts precinct fostering creativity and community

The Bandari Project

Fighting poverty by providing educational opportunities to underprivileged children and women in Tanzania

With One Seed

Supporting subsistence tree farmers in Timor-Leste for climate justice and economic growth

Another idea... Seed a Future Fund for your favourite organisation

At Australian Communities Foundation, we believe our community has a powerful role to play in helping NFPs build long-term resilience. That starts with having conversations with the organisations you know and love – about how they're planning for the future, and how you might support them to get there.

One way to do that is by **seeding a Future Fund** (starting from \$10,000) – giving your favourite organisation the platform to grow, adapt, and deliver impact for generations to come. **Contact us for a conversation.**

Explore how Future Funds help not-for-profits build resilience

Download the **NFP Resilience Report** to learn about the challenges and opportunities shaping Australia's not-for-profit sector – and how investment-based endowments can support organisations into the future.
