What is Enrise

Enrise is an Australian registered charity delivering technology based supported programs to vulnerable and at-risk children and youth.

What we do

Through our award-winning delivery partner social enterprise platform **Need a Tutor**, we provide online tutoring and donated digital devices to K-12 children most in need of support.

- Vulnerable children are provided with a donated repurposed computer if they do not have one.
- Enrise will find, match and connect a qualified teacher / tutor with each child and conduct regular tutoring sessions via Need a Tutor's proprietary platform.

What outcomes do we achieve

Digital provision and tutoring support through Enrise yield significant improvements, particularly for those experiencing prolonged educational gaps due to transition, poor school attendance or low literacy and numeracy levels.

We see:

1. An increase in student confidence, improvements in school attendance and advancements in academic levels.
2. A trusted ongoing relationship with a qualified teacher / tutor
3. Increased school graduation resulting in improved employability and / or tertiary admission.

Who do we work with

Enrise provides support to various sectors engaging with children of disadvantage including:

- Indigenous Corporations
- OOHC (Out of Home Care) Organisations
- Remote Community Schools
- Learning Clubs and Homework centres
- Charities
- Low Socio economic / Cultural and Linguistically Diverse

How can you help

At no charge to our children, we are seeking partnership to enable more provisions and support more children to become part of our programs.

We welcome charities, corporates, foundations and benevolent parties to engage with us ensuring we continue to provide more services to more children in need.

COVID impact

The impact of COVID has been more acutely felt by the children across Australia, in particular Victoria and NSW. Many children cannot remote learn due to school closures and lack of a digital device and a large proportion of schools do not have the capability to remote teach, leaving thousands of children without any education during lockdowns.
