

### SCHOOL DETAILS

**School name:** Salut 1 Primary School

**Location :** Kayangan District, North Lombok, Indonesia (8°15'49.0"S 116°19'12.1"E)

**No. students:** 141 (76 male + 65 female)

**No. teachers:** 9 (5 male + 4 female)

#### History of the school

SDN 1 Salut was established in 1980 by the government to provide primary education for children in Salut Village, Kayangan District, North Lombok. The school had six classrooms for six study groups and a staff room. Unfortunately, the school building was affected by the Lombok earthquake in 2018.

#### Current situation

The earthquake destroyed all the classrooms and the staff room. Then, in 2019, the school received five permanent classrooms from the government. Five study groups use these classrooms. Meanwhile, one study group is still learning in the emergency classroom built after the earthquake. The emergency classroom was constructed of plywood walls, zinc roofs, and cemented floors. This classroom is in poor condition; the walls are no longer intact, and the class has no furniture. The students are studying on the carpet. As for the staff room, up until now, the teachers occupied the SMPN 4 Satap Kayangan health clinic, sharing spaces with the secondary school teachers.

The school desperately needs one decent classroom, a staff room, and four toilets for its members to safely and comfortably conduct practical learning activities.

#### Project proposal

Classroom of Hope and our local partner plan to improve the learning conditions for teachers and students at SDN 1 Salut by providing 1 classroom, 1 staff room, and 4 toilets. The classrooms will be connected by a common wall and will feature an open terrace area along the front. They will be built using recycled plastic blocks, which are earthquake-resistant and certified to last up to 100 years. The classrooms will feature aluminium doors and window frames, galvanised metal roofing, and floors finished in white ceramic tiles. They will be fully furnished with desks, chairs, fans and whiteboards. Our local implementing partner will engage a trusted local building contractor to coordinate the construction, purchase local materials, and reuse or recycle materials wherever possible.

As this is a public school, the government manages the teachers' training and salaries. The school staff and community will be responsible for the operation and maintenance of the new school building. These new, fully equipped, and environmentally sustainable classrooms will allow the students at SDN 1 Salut to learn in safe and comfortable surroundings, well protected from the elements.

### SUMMARY OF CURRENT NEEDS

No. Classes	Current no. Classrooms	Current no. Staff Rooms	Classrooms Needed	Staff Rooms Needed	Toilets Needed
